

QUALITY ADVANTAGE WASHER PUMPS

O.E. FIT & FORM DEPENDABLE QUALITY

Direct-fit triumphs over universal fit

Some applications require removal of the vehicles bumper cover and even more components for washer pump service. As an OES manufacturer, ACI® units are engineered as a direct fit O.E. replacement. Many applications pay as much as 1.5 labor hours to replace. Don't waste your customers time with universal pumps that do not fit.

THE ACI® DIFFERENCE
